

EPA NEWS - JUNE 2023

Welcome to the first quarterly update from the EPA team here at IMechE.

EPA Update

Since IMechE became an End-Point Assessment Organisation in 2018, we have carried out 2,338 assessments. By the end of 2023 this number will have risen sharply to 3,834 and the huge increase in the number scheduled continues to rise, ensuring the ongoing development of the next generation of engineers and technicians.

Our goal is to deliver assessments at the highest quality giving all parties involved the confidence to see IMechE as the perfect EPAO to work with through the End-Point Assessment process.

New EPA webpages

Those of you that have visited the IMechE website recently will have noticed that we have a new and refreshed webpage for End-Point Assessment. It is now a central portal for everything you need on EPA, resources, our standards and policies. You can also see who's who in the IMechE EPA Operations Team.

All resources can be found on the new pages and please ensure that you have the latest versions of all the documents. If you need any advice, please contact us at epa@imeche.org

The role of the Supporter

One of the questions asked when we are speaking with training providers is - What is the role of supporters during the EPA process?

Fortunately, one of our most experienced assessors, Paul Merrick CEng FIMechE is on hand to give us his essential tips and advice to those supporting apprentices with their End-Point Assessment.
