ENGINEERS**

BECOME A MEMBER

Improving the world through engineering

imeche.org

A GLOBAL INSTITUTION.

Membership of the Institution of Mechanical Engineers connects you to the world of mechanical engineering. Whether you are working towards professional registration, wish to progress to a different category of membership or simply have an interest in the world of engineering – we can support you.

Engineering leads the way in improving our world so we are safer, happier and can lead more fulfilling lives.

As a leading professional engineering body, with over 120,000 members worldwide, we are proud of the contribution our members make working at the heart of the most important and dynamic industries in the world.

We can provide the professional support, learning and development that you need throughout your working life.

Wherever you want to be, the Institution can help take you there.

“““

Joining IMechE helps you develop your network and kick-start your engineering career.

MEMBERSHIP OPTIONS.

Apprentice and Student Affiliate

If you are on an apprenticeship or your first degree, our free affiliate membership is for you. It provides all the knowledge, news and support you need throughout your studies.

Affiliate

For those with an interest in engineering and who want to be part of a leading institution in the sector – this is the membership for you.

Associate (AMIMechE)

If you have graduated with a science, technology, engineering and mathematics (STEM) degree, our Associate Membership can support you on your journey to professional registration.

Professional Registration

Professional registration is an independent, globally recognised benchmark demonstrating your engineering competence and experience. Wherever you want to go in your career, professional registration can help get you there.

EngTech (EngTech MIMechE)

For technicians who use proven procedures to solve practical engineering problems and can demonstrate learning to NVQ/SVQ Level 3 or similar.

Incorporated Engineer (IEng MIMechE)

For those who are often involved in operational roles, maintaining and managing the application of technology at the highest efficiency and can demonstrate learning to a Bachelor's degree level.

Chartered Engineer (CEng MIMechE)

For those involved in solving engineering problems either by innovation, creativity or change and can demonstrate learning to the equivalent of a Master's degree.

Fellow (FIMechE)

Fellowship with the Institution is a mark of your exceptional commitment to, and innovation in, mechanical engineering. It is the most senior category of membership.

BENEFITS OF MEMBERSHIP.

Our membership benefits are designed to support your career goals at every stage – from college and university, throughout your working life and through to retirement.

We can support your professional development with structured and informal learning. Whether you volunteer with us, attend events and training or read *Professional Engineering* – it all counts.

Apprentices and students

Enhance your learning

- Take advantage of our awards and scholarships
- Access our world-class library with free online databases, texts and journals
- Read the latest policy reports, briefings and engineering opinion
- Attend training, webinars, lectures and conferences – either free or with member discounts
- Receive financial, emotional and practical support from our Support Network

Keep up to date

- Receive regular e-newsletters on the latest engineering news
- Download our *Professional Engineering* app

Connect to our engineering network

- Take part in our exciting challenges – Formula Student, Railway Challenge, Unmanned Aircraft Systems Challenge and more
- Get involved with our volunteering opportunities
- Connect and network with members at talks, visits and social events locally and nationally

Associate Members

Our Associate Members can also:

- Use the AMIMechE post-nominals
- Keep up to date with our free *Professional Engineering* magazine, app, e-newsletters and website
- Access the Developing Engineers Programme, a structured and easy to use online tool to help achieve professional registration

Professionally registered engineers and technicians

Be recognised

- Use globally recognised letters after your name – EngTech MIMechE, IEng MIMechE, CEng MIMechE
- Get professionally recognised with improved career prospects and earning potential

Be informed

- Keep up to date with our free *Professional Engineering* magazine, app, e-newsletters and website
- Plan, record and review your CPD – our online Career Developer tool allows you to create a record of your CPD which you can take from job to job
- Attend national and local events – lectures, talks, conferences, webinars and social events for free or with member discounts
- Attend high calibre training with member discounts

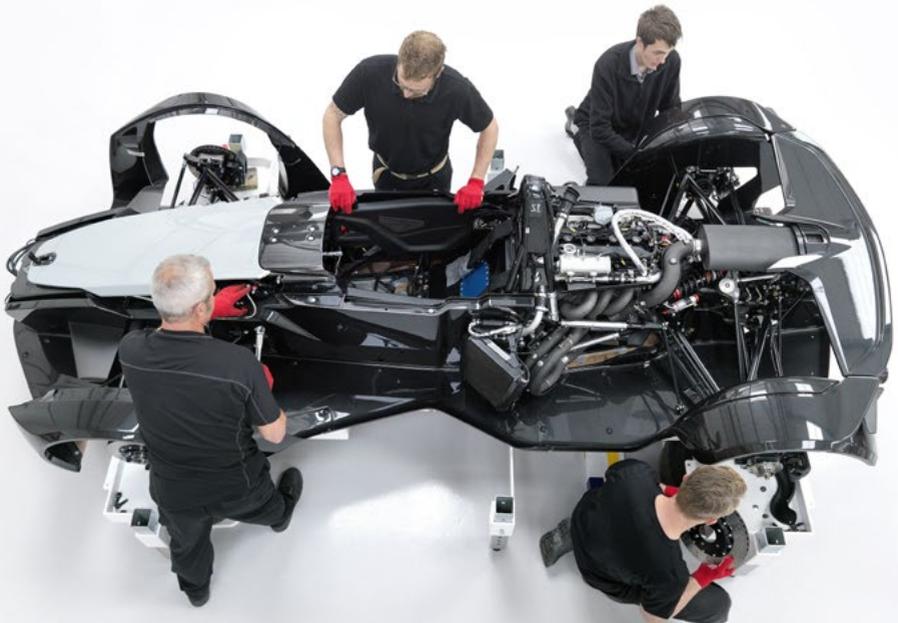

- Access our world-class library with free online databases, texts and journals
- Read the latest policy reports, briefings and engineering opinion

Connect to our engineering network

- Connect and network with members at talks, visits and social events in your local area
- Get involved with our volunteering opportunities to inspire future generations and support engineers with their professional aspirations

Also benefit from:

- Advice and financial, emotional and practical support from our Support Network
- Discounted venue hire and business facilities at our head office in London

INVESTING IN YOUR FUTURE.

Up-to-date membership, application and Engineering Council fees can be found on our website.

imeche.org/fees

Some membership fees have been subsidised for younger members as part of our commitment to supporting engineers early in their careers.

MEET OUR MEMBERS.

“““

Getting Chartered is a way of proving that I meet certain professional standards. To colleagues and employers, but also to myself. It's not just a title or set of letters after my name – it's a development process, and I value the things I'll have to learn to achieve it.

Tiwaloluwa Jayeola AMIMechE

“““

From becoming an Associate Member to applying for professional registration took me about a year. The process was more streamlined for me because of the experience I had already gained in my career. Chartered status is a recognised mark of technical engineering knowledge. It's like a global engineering passport.
